

Cut Costs While Creating A Safer Workplace

For some people “workplace safety” is a burden. But many companies know that a little attention to worker’s attitudes create lasting workplace safety. They have reduced accidents and the accompanying high personal and financial costs.

Compliance Geeks have expertise in:

- Occupational safety and health compliance
- Packaging, shipping and handling hazardous materials
- Worker’s Compensation case management
- OSHA, DOT, EPA, state and local regulations

Strategic Partners have expertise in:

- Human Resources, including the Fair Labor Standards Act, the Family Leave Act and others
- Environmental compliance and safety
- Health care regulation: HIPAA, JCAHO
- Business Ethics
- Business Behavior/Culture Change

Get On Top Of Regulatory Requirements

COMPLIANCE *Geeks*

A Partner With Long-Range Vision

You need a partner who knows government regulations inside and out. Someone who lives and breathes the law and its requirements. You need a Compliance Geek.

A Compliance Geek makes workplace safety a reality, not just a slogan. Companies that have adopted the Compliance Geeks Reality-Based™ Safety program have seen an 80 percent reduction in accidents and a positive impact on the bottom line.

Safety Training

Our Reality-Based™ methodology leverages the real-world industry experience of our trainers to create effective, successful training sessions. Many of our instructors regularly facilitate OSHA-accredited programs for the National Training Institute and some have even taught OSHA inspectors.

Safety Consulting Services

Compliance Geeks safety consulting and on-site services are driven by the same philosophy that guides our training: maximize impact and minimize effort and time by customizing recommendations to fit the client.

Real Safety For Real Workplaces

Every employer needs a safety program. Failure to do so puts any company and its employees and managers at risk. Compliance Geeks will help you navigate government regulations, from services to training tools. Motivate workers to see their job from a new perspective not just the how but the why a safer workplace benefits everyone.

- **Safety, OSHA, DOT and EPA-Compliance Audits.** Staff is trained by OSHA and experienced in OSHA/DOT/EPA inspection protocols. Include a comprehensive report and, when appropriate, a videotape of our findings.
- **Job-Hazard Analysis.** Citing relevant OSHA/DOT/EPA regulations.
- **Engineering Assistance.** Turnkey engineering services range from testing air quality to redesigning a task or workstation.
- **Gap analysis.** Identification of noncompliance, programs and recordkeeping assessment and assistance for supervisors and employees in recognizing hazards.
- **Expert Testimony.** Available to testify or provide expert opinions for court cases.

Our staff has experience consulting and training for leading companies like Boeing, Cummins Diesel, Daimler-Chrysler, Excelon Nuclear Power, Hormel Meats, Kraft Foods, Mitsubishi, Northern Illinois University, Ondeo/Nalco Chemical, Target Stores, US National Park Service, Universal Studios, Viacom, Whirlpool, Yellow-Roadway Transportation, and many others.

Support For Existing Safety Programs

Compliance Geeks also offers its Reality-Based™ safety methodology in a do-it-yourself format. These easy-to-use tools serve in auditing the workplace for safety, managing safety efforts and completing and filing incident reports.

- **Safety Manager Suite**, a database of hundreds of documents to make your workplace a safe place.
- **Reality-Based™ Safety Starter Kit**, a four-part resource for understanding and complying with regulatory standards.
- **Work Site Analysis Kit**, featuring training materials, audit checklists and recordkeeping instructions and forms.
- A full line of 5- to 15-minute safety videos and interactive training CDs.

Make safety part of the job and not just a burden. Make workplace safety a reality. Call for further information
